

T2a-01 [EVAL] targets, in this order: RED then GREEN

each target under its own block; occlusion: partial/partial; best order: blue → red → yellow → green (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. red far edge 7.6 cm left edge 4.6 cm turned +2° (straight) flat on the table (TARGET 1)
2. green far edge 15.0 cm left edge 16.7 cm turned +22° (far end to the left) flat on the table (TARGET 2)
3. blue far edge 7.9 cm left edge 5.2 cm turned +18° (far end to the left) lies on red, level
4. yellow far edge 13.4 cm left edge 16.3 cm turned +15° (far end to the left) lies on green, level

T2a-02 [EVAL] targets, in this order: GREEN then BLUE

each target under its own block; occlusion: partial/partial; best order: yellow → green → red → blue (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. green far edge 8.3 cm left edge 12.3 cm turned -4° (far end to the right) flat on the table (TARGET 1)
2. blue far edge 9.5 cm left edge 5.0 cm turned $+21^\circ$ (far end to the left) flat on the table (TARGET 2)
3. yellow far edge 7.9 cm left edge 12.4 cm turned $+85^\circ$ (far end to the left) lies on green, level
4. red far edge 9.0 cm left edge 4.9 cm turned -48° (far end to the right) lies on blue, level

T2a-03 [EVAL] targets, in this order: BLUE then YELLOW

each target under its own block; occlusion: partial/partial; best order: red → blue → green → yellow (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. blue far edge 17.1 cm left edge 16.7 cm turned -22° (far end to the right) flat on the table (TARGET 1)
2. yellow far edge 13.8 cm left edge 6.5 cm turned $+22^\circ$ (far end to the left) flat on the table (TARGET 2)
3. red far edge 17.7 cm left edge 16.1 cm turned $+37^\circ$ (far end to the left) lies on blue, level
4. green far edge 12.3 cm left edge 6.1 cm turned $+76^\circ$ (far end to the left) lies on yellow, level

T2a-04 [EVAL] targets, in this order: YELLOW then RED

each target under its own block; occlusion: partial/partial; best order: green → yellow → blue → red (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. yellow far edge 7.6 cm left edge 17.6 cm turned -9° (far end to the right) flat on the table (TARGET 1)
2. red far edge 13.7 cm left edge 7.4 cm turned -3° (far end to the right) flat on the table (TARGET 2)
3. green far edge 7.9 cm left edge 17.5 cm turned -38° (far end to the right) lies on yellow, level
4. blue far edge 11.3 cm left edge 4.1 cm turned -1° (straight) slid off: lies on the table, level

T2a-05 [EVAL] targets, in this order: RED then YELLOW

each target under its own block; occlusion: partial/partial; best order: green → red → blue → yellow (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. red far edge 8.2 cm left edge 16.1 cm turned +44° (far end to the left) flat on the table (TARGET 1)
2. yellow far edge 13.3 cm left edge 4.7 cm turned +10° (far end to the left) flat on the table (TARGET 2)
3. green far edge 9.0 cm left edge 16.6 cm turned +65° (far end to the left) lies on red, level
4. blue far edge 14.3 cm left edge 4.7 cm turned -9° (far end to the right) lies on yellow, level

T2a-06 [EVAL] targets, in this order: GREEN then RED

each target under its own block; occlusion: partial/partial; best order: blue → green → yellow → red (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. green far edge 13.1 cm left edge 15.4 cm turned -29° (far end to the right) flat on the table (TARGET 1)
2. red far edge 9.6 cm left edge 10.2 cm turned -17° (far end to the right) flat on the table (TARGET 2)
3. blue far edge 12.3 cm left edge 14.7 cm turned -57° (far end to the right) lies on green, level
4. yellow far edge 8.3 cm left edge 10.9 cm turned -27° (far end to the right) lies on red, level

T2a-07 [SPARE] targets, in this order: BLUE then GREEN

each target under its own block; occlusion: partial/partial; best order: yellow → blue → red → green (4 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

- 1. blue far edge 9.8 cm left edge 14.3 cm turned +37° (far end to the left) flat on the table (TARGET 1)
- 2. green far edge 10.3 cm left edge 5.4 cm turned -34° (far end to the right) flat on the table (TARGET 2)
- 3. yellow far edge 9.3 cm left edge 14.2 cm turned +69° (far end to the left) lies on blue, level
- 4. red far edge 9.2 cm left edge 5.5 cm turned -23° (far end to the right) lies on green, level

T2b-01 [EVAL] targets, in this order: GREEN then RED

one block lies across both targets; occlusion: partial/partial; best order: blue → green → red (3 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. green far edge 16.8 cm left edge 12.2 cm turned $+25^\circ$ (far end to the left) flat on the table (TARGET 1)
2. red far edge 14.7 cm left edge 16.7 cm turned $+19^\circ$ (far end to the left) flat on the table (TARGET 2)
3. yellow far edge 17.4 cm left edge 5.9 cm turned -14° (far end to the right) flat on the table
4. blue far edge 15.9 cm left edge 14.5 cm turned -66° (far end to the right) lies on green and red, level

T2b-02 [EVAL] targets, in this order: BLUE then GREEN

one block lies across both targets; occlusion: partial/partial; best order: yellow → blue → green (3 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. blue far edge 13.8 cm left edge 10.4 cm turned -23° (far end to the right) flat on the table (TARGET 1)
2. green far edge 15.9 cm left edge 15.1 cm turned -27° (far end to the right) flat on the table (TARGET 2)
3. red far edge 5.2 cm left edge 5.3 cm turned $+24^\circ$ (far end to the left) flat on the table
4. yellow far edge 15.4 cm left edge 12.2 cm turned $+72^\circ$ (far end to the left) lies on blue and green, level

T2b-03 [EVAL] targets, in this order: YELLOW then BLUE

one block lies across both targets; occlusion: partial/partial; best order: red → yellow → blue (3 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. yellow far edge 10.9 cm left edge 9.9 cm turned -29° (far end to the right) flat on the table (TARGET 1)
2. blue far edge 13.2 cm left edge 14.1 cm turned -35° (far end to the right) flat on the table (TARGET 2)
3. green far edge 14.9 cm left edge 3.8 cm turned -12° (far end to the right) flat on the table
4. red far edge 11.2 cm left edge 12.3 cm turned $+59^\circ$ (far end to the left) lies on blue and yellow, level

T2b-04 [EVAL] targets, in this order: RED then GREEN

one block lies across both targets; occlusion: partial/partial; best order: blue → red → green (3 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. red far edge 8.4 cm left edge 12.5 cm turned -7° (far end to the right) flat on the table (TARGET 1)
2. green far edge 9.0 cm left edge 17.6 cm turned -9° (far end to the right) flat on the table (TARGET 2)
3. yellow far edge 12.7 cm left edge 5.6 cm turned -25° (far end to the right) flat on the table
4. blue far edge 9.2 cm left edge 15.1 cm turned $+69^\circ$ (far end to the left) lies on green and red, level

T2b-05 [SPARE] targets, in this order: GREEN then YELLOW

one block lies across both targets; occlusion: partial/partial; best order: red → green → yellow (3 steps)

arm-camera view, table blocks only:

arm-camera view, finished scene:

Build in this order (numbers = the circles in the top view). Positions are block centres.

1. green far edge 16.9 cm left edge 11.3 cm turned -6° (far end to the right) flat on the table (TARGET 1)
2. yellow far edge 17.5 cm left edge 16.2 cm turned -5° (far end to the right) flat on the table (TARGET 2)
3. blue far edge 6.8 cm left edge 10.6 cm turned $+14^\circ$ (far end to the left) flat on the table
4. red far edge 16.2 cm left edge 13.6 cm turned $+79^\circ$ (far end to the left) lies on green and yellow, level
